EXPERIENCE:

PROGRAMMING

Volunteer | 2018

Helped to program acoustic monitoring devices that we deployed in order to pick up bat calls. This is in an effort to mitigate White Nose Syndrome in bats.

Self-Employed | April 2018-present

• Digital Art

Create digital art and t-shirts to sell on Etsy and Amazon. I make use of SEO, and stay current with trends.

• QKids

Use software to teach Chinese children English. I enjoy tutoring, teaching, and using math skills to maximize fun while learning.

FRONT-END DEVELOPMENT

Coursework | 2016-2018

• Advanced HTML/CSS

Web terminology, HTML5, uploading pages to a server using FTP, site management, links, lists, tables, forms, video, iframes, working with graphics, and accessibility. CSS3 and responsive mobile web design.

• Intermediate Preprocessors

Use of responsive design, grids, transitions/transforms, and CSS preprocessors, such as SASS or LESS, to save time, improve code organization, and make sites easier to maintain.

• Wordpress

I can sophisticated, dynamic, interactive and fully functional websites using WordPress.

• Graphic Design

The design process, from developing an idea from thumbnail sketch, through tight roughs, to a comprehensive design. Focuses on the importance of presentation, industry standards and professional tools and techniques.

More Experience

• Photoshop

I have extensive knowledge of Photoshop. I have created professional graphic images using Adobe Photoshop. I have at least a basic knowledge level in most Adobe CC products.

• R-Programming

Use of R's language to create several statistical analyses. Extensive knowledge of making graphs and applying appropriate tests. I am very familiar with creating and maintaining spreadsheets.
